

APPENDIX E

REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

Paragraph Number	Paragraph Title	Page Number
E-1	Scope	E-1
E-2	General	E-1
E-3	Explanation of Columns (Sections II and III)	E-2
E-4	Explanation of Columns (Section IV)	E-6
E-5	Special Information	E-6
E-6	How To Locate Repair Parts	E-7
E-7	Abbreviations	E-7

E-1. SCOPE.

This repair parts and special tools list (RPSTL) lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for the performance of Unit, Direct Support, and General Support maintenance of the M870 and M870A1 semitrailers. This RPSTL authorizes the requisitioning, issue, and disposition of spares, repair parts, and special tools as indicated by the source, maintenance, and recoverability (SMR) code.

E-2. GENERAL.

In addition to Section I, this RPSTL is divided into the following sections:

- a. **Section II. Repair Parts List.** A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts that must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in item name sequence. Repair parts kits are listed separately in their own functional group within Section II.
- b. **Section III. Special Tools List.** A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL for the performance of maintenance.
- c. **Section IV. Cross-reference Indexes.** There are two indexes. The first is a list, in national item identification number (NIIN) sequence, of all national stock numbered items appearing in the listings; the second is a list, in alphanumeric sequence, of all part numbers appearing in the listings. National stock numbers (NSNs) and part numbers are cross-referenced to each illustration/figure and item number appearance.

E-3. EXPLANATION OF COLUMNS (SECTIONS II AND III).

- a. **ITEM NO. [Column (1)].** Indicates the number used to identify items called out in the illustration.
- b. **SMR CODE [Column (2)].** The SMR code is a five-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instruction, as shown in the following breakout:

* Complete Repair: Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

- (1) **Source Code.** The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follow:

Code

PA
PB
PC**
PD
PE
PF
PG

Application/Explanation

Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the code entered in the third position of the SMR code.

***Items coded PC are subject to deterioration.*

KD
KF
KB

Items with these codes are not to be requested/requisitioned individually. They are part of a kit that is authorized to the maintenance category indicated in the third position of the SMR code. The complete kit must be requisitioned and applied.

MO - Made at UNIT/AVUM Level
MF - Made at DS/AVUM Level
MH - Made at GS Level
MD - Made at Depot

Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material that is identified by the part number in the DESCRIPTION AND USABLE ON CODE (UOC) column and listed in the bulk material group of the repair parts list in this RPSTL. If the item is authorized to you by the third-position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.

AO - Assembled by UNIT/AVUM Level
AF - Assembled by DS/AVUM Level
AH - Assembled by GS Level
AD - Assembled at Depot

Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the third-position code of the SMR code authorizes you to replace the item, but the source code indicates that the item is assembled at a higher level, order the item from the higher level of maintenance.

E-3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (continued).

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the preceding source codes, except for those source-coded "XA."

XA - DO NOT requisition an "XA"-coded item. Order its next higher assembly.

XB - If an "XB" item is not available from salvage, order it using the CAGEC and part number given.

XC - Installation drawing, diagram, instruction sheet, or field service drawing that is identified by manufacturer's part number.

XD - Item is not stocked. Order an "XD"-coded item through normal supply channels using the CAGEC and part number given if no NSN is available.

(2) **Maintenance Code.** Maintenance codes tell you the level(s) of maintenance authorized to use and repair/support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance:

<u>Code</u>	<u>Application/Explanation</u>
C	Crew or Operator maintenance done within Unit maintenance or Aviation Unit maintenance.
O	Unit maintenance or Aviation Unit can remove, replace, and use the item.
F	Direct Support or Aviation Intermediate level can remove, replace, and use the item.
H	General Support level can remove, replace, and use the item.
L	Specialized repair activity (SRA) can remove, replace, and use the item.
D	Depot level can remove, replace, and use the item.

NOTE

If authorized by the maintenance allocation chart (MAC) and SMR codes, some limited repair may be done on an item at a lower level of maintenance.

(b) The maintenance code entered in the fourth position tells whether the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized "Repair" functions). This position will contain one of the following maintenance codes:

E-3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (continued).

<i>Code</i>	<i>Application/Explanation</i>
O	Unit maintenance or Aviation Unit is the lowest level that can do complete repair of the item.
F	Direct Support or Aviation Intermediate is the lowest level than can do complete repair of the item.
H	General Support is the lowest level that can do complete repair of the item.
L	SRA is the lowest level that can do complete repair of the item.
D	Depot is the lowest level that can do complete repair of the item.
Z	Nonrepairable. No repair is authorized.
B	No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B"-coded item.) However, the item may be reconditioned by adjusting, lubricating, and so on, at the user level.

- (3) **Recoverability Code.** Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR code as follows:

<i>Code</i>	<i>Application/Explanation</i>
Z	Nonrepairable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the third position of the SMR code.
O	Repairable item. When uneconomically repairable, condemn and dispose of the item at Unit maintenance or Aviation Unit level.
F	Repairable item. When uneconomically repairable, condemn and dispose of the item at the Direct Support or Aviation Intermediate level.
H	Repairable item. When uneconomically repairable, condemn and dispose of the item at the General Support level.
D	Repairable item. When beyond lower-level repair capability, return to Depot. Condemnation and disposal of the item is not authorized below Depot level.
L	Repairable item. Condemnation and disposal of the item is not authorized below SRA.
A	Item requires special handling or condemnation procedures for specific reasons (e.g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

- c. **NSN [Column (3)].** The NSNs for the items are listed in this column.

E-3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (continued).

- d. **CAGEC [Column (4)].** The commercial and government entity code (CAGEC) is a five-digit alphanumeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

NOTE

When you use an NSN to requisition an item, the item you receive may have a part number different from the part ordered.

- e. **PART NUMBER [COLUMN (5)].** Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements, to identify an item or range of items.
- f. **DESCRIPTION AND USABLE-ON CODE (UOC) [Column (6)].** This column includes the following information:
- (1) The Federal item name and, when required, a minimum description to identify the item.
 - (2) Physical security classification. Not applicable.
 - (3) Items that are included in kits and sets are listed below the name of the kit or set on Figure KIT.
 - (4) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry.
 - (5) Part numbers for bulk materials are referenced in this column in the line item entry for the item to be manufactured/fabricated.
 - (6) When the item is not used with all serial numbers of the same model, the effective serial numbers are shown on the last line(s) of the description (before the UOC).
 - (7) The UOC, when applicable (see para E-5, Special Information).
 - (8) In the Special Tools List section, the Basis of Issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment. When density of equipments supported exceeds density spread indicated in the BOI, the total authorization is increased proportionately.
 - (9) The statement "END OF FIGURE" appears just below the last item description in Column 5 for a given figure in both Section II and Section III.
- g. **QTY [Column (7)].** The QTY(quantity per figure) column indicates the quantity of the item used in the breakout shown on the illustration/figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and may vary from application to application.

E-4. EXPLANATION OF COLUMNS (SECTION IV).

a. **National Stock Number (NSN) Index.**

- (1) **STOCK NUMBER Column.** This column lists the NSN by NIIN sequence. The NIIN consists of the last nine digits of the NSN (i.e.,
NSN
5305-01-674-1467). When using this column to locate an item, ignore the first four digits
NIIN
of the NSN. However, the complete NSN should be used when ordering items by stock number.
- (2) **FIG. Column.** This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.
- (3) **ITEM Column.** The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. **Part Number Index.** Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination that places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

- (1) **CAGEC Column.** The CAGEC is a five-digit alphanumeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.
- (2) **PART NUMBER Column.** Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements, to identify an item or range of items.
- (3) **STOCK NUMBER Column.** This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and CAGEC columns to the left.
- (4) **FIG. Column.** This column lists the number of the figure where the item is identified/located in Section II and Section III.
- (5) **ITEM Column.** The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

E-5. SPECIAL INFORMATION.

a. **Usable-on Code.** Indicates the model on which the item is used.

<u>Code</u>	<u>Used On</u>
T01	M870
U17	M870 Marine Variation
TLB	M870A1

b. **Fabrication Instructions.** Bulk materials required to manufacture items are listed in the Bulk Material Functional Group of this RPSTL. Part numbers for bulk material are also referenced in the DESCRIPTION column of the line item entry for the item to be manufactured/fabricated. Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in Appendix G of this manual.

E-5. SPECIAL INFORMATION (continued).

- c. **Assembly Instructions.** Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in Appendix G.
- d. **Kits.** Line item entries for repair parts kits appear in group 9401 in Section II.
- e. **Index Numbers.** Items that have the work BULK in the FIG. column will have an index number shown in the ITEM column. This index number is furnished for use as a cross-reference between the NSN/part number index and the bulk material list in Section II.
- f. **Associated Publications.** Not applicable.

E-6. HOW TO LOCATE REPAIR PARTS.

- a. When the NSN or part number is not known, you can locate a repair part by following these steps:
 - (1) **First.** Using the Table of Contents, determine the assembly group or subassembly group to which the item belongs. This is necessary because figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.
 - (2) **Second.** Find the figure covering the assembly group or subassembly group to which the item belongs.
 - (3) **Third.** Identify the item on the figure and note the item number of the item.
 - (4) **Fourth.** Refer to the Repair Parts List for the figure to find the line item entry for the item number noted on the figure.
- b. When the NSN or part number is known, you can locate a repair part by following these steps:
 - (1) **First.** Using the National Stock Number Index or the Part Number Index, find the pertinent NSN or part number. The National Stock Number Index is in NIIN sequence. The part numbers in the Part Number Index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the figure number and the item number of the item you are looking for.
 - (2) **Second.** After finding the figure and item numbers, verify that the item is the one you're looking for; then locate the item number in the Repair Parts List for the figure.

E-7. ABBREVIATIONS.

For standard abbreviations see MIL-STD-12, Abbreviations for Use on Drawings, Specifications, Standards, and in Technical Documents.
